Phnom Penh, Cambodia

SKILLS

- C/C++
- HTML / CSS
- JavaScript
- Bootstrap / TailwindCSS
- React.Jsx
- Node.js / Express
- Laravel
- Nest.js
- MySQL / MongoDB
- Flutter / Dart
- Git / GitHub
- REST API

LANGUAGE

- Khmer — Native
- English — [advanced]

REFERENCE

TIM VUTHIN

POSITION: JUNIOR FULL STACK WEB DEVELOPER

ABOUT ME

IT Instructor and 3rd-year IT student at PPI Institute specializing in full-stack and backend web development. Experienced in delivering technical instruction in C/C++ fundamentals and frontend development, alongside building end-to-end web applications—including e-commerce platforms—using Express, Laravel, NestJS, React, Flutter, MySQL, and MongoDB. Skilled in designing secure RESTful APIs, implementing JWT authentication, building Telegram Bot integrations, and connecting Bakong KHQR payment gateways. Combines a strong foundation in tech education with a passion for engineering scalable web architectures.

EXPERIENCE

IT Instructor

ETEC Center - 2025 - Present

- **Frontend Web Development:** Instructed students in modern frontend technologies, covering HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript (ES6+), and React.js.
- **Programming & Algorithms:** Delivered structured training in C and Object-Oriented Programming (OOP) in C++ and Database MySQL, WorkBance query and connect with C++, emphasizing core algorithms, data structures, and logical problem-solving.
- **Database Fundamentals:** Taught relational database design and management using MySQL, focusing on schema structuring, indexing, and executing complex SQL queries.

MY SKILL

Programming Languages

- **C/C++** — OOP, algorithms, and problem solving
- **JavaScript** — ES6+, arrays, objects, DOM, async/await, Fetch API

Frontend Development

- **CSS, TailwindCSS**
- **HTML** — Semantic HTML and responsive page structure
- **React.js** — Components, props, state, hooks, Context API, React Router, API integration

Backend Development

- **Node.js / Express.js** — REST APIs, middleware, authentication, CRUD operations
- **NestJS** — Modular backend architecture, controllers, services, DTOs, validation, REST APIs
- **Laravel** — MVC architecture, migrations, models, controllers, requests, API development

Database : MYSQL, MongoDB

Mobile Development

- **Flutter / Dart** — UI development, navigation, API integration, state management
